The Veridocs ID authentication module verifies a wide array of security features unique to a particular ID against a frequently updated database of domestic and global identification documents including passports and driver's licenses. Our Evolution platform offers this module on an easy-to-use interface. TrueAuthentication also integrates with third-party systems.

√ Store data within your firewall for added security

√ Maintain records for audit trail

√ Access support 24/7/365 with US-based services

Near-Infrared Features

Light-absorbing inks applied only to certain fields

Ultraviolet Light Features

State seals or other designs visible only in UV light

Bar Code, RFID and Magstripe Features

Machine-readable data scanned and cross-matched to front of ID document

VERIDOCS™
Be certain.

Authenticate

Insert ID into the document reader at a kiosk, point of sale, or front desk

ID is scanned and cross-referenced against our industry-leading database of global ID documents

Encoded and printed data is evaluated to ensure the security features unique to the document are present

Scan is completed in a few seconds with easy to interpret results

Issues are discreetly reported to front or back of house staff for further action

TrueAuthentication® is one of six modules in the Evolution platform.

VERIDOCS™ EVOLUTION

- Mobile Verification
- mDL
- ID Authentication
- Facial Comparison
- Document Imaging
- Watch List Monitoring
- Watch List Screening
