

Don't just verify. Authenticate.

In seconds, TrueAuthentication goes beyond basic ID scanners to confirm all readable components of an ID and its security features.

- ✓ Authenticate ID documents
- ✓ Autofill forms; save time for staff and patrons
- ✓ Reduce staff errors in ID checks
- ✓ Reduce the risk of fraud
- ✓ Improve legal compliance

TrueAuthentication technology

- ✓ Checks against one of the world's most frequently updated libraries of government-issued IDs
- ✓ Confirms the validity of security features using white light, ultraviolet light, and near-infrared
- ✓ Confirms a match between the bar code, RFID, and magstripe data with data printed on the front of the ID, offering security far beyond a simple bar code scan
- ✓ Easily integrates with other systems to retain data

Creating a more secure world.

- ✓ Streamlining legal compliance
- ✓ Enabling more secure environments
- ✓ Improving patron service
